

# Factsheet 1:

## Determine which training is right for you.

### N95 Respirators (aka: Filtering Facepiece Respirators)

N95s are highly effective at reducing the spread of common diseases such as Covid-19, the flu, and tuberculosis.

If you need to wear these, sign up for training on [LearningCentral.unm.edu](https://learningcentral.unm.edu).

**Search for the class:**  
"N95 Respirator Fit Test & Training"

Classes are available every:  
Monday at 1:00, 1:45, & 2:30 PM &  
Thursday at 9:00, 9:45, & 10:30 AM

### Loose-Fitting Respirators (aka: PAPRs, CAPRs)

PAPRs & CAPRs are the only respirators you may wear with facial hair. They perform similar functions to N95s.

If you need to wear these, sign up for training on [LearningCentral.unm.edu](https://learningcentral.unm.edu).

**Search for the class:**  
"Half Face, Full Face, PAPR, & CAPR Respirator Fit Test & Training"

Classes are available every:  
Thursday at 11:15 AM

### Tight-Fitting Full Face & Half Face Respirators

These respirators are primarily for minimizing exposure to harmful chemical vapors and dust.

If you need to wear these, sign up for training on [LearningCentral.unm.edu](https://learningcentral.unm.edu).

**Search for the class:**  
"Half Face, Full Face, PAPR, & CAPR Respirator Fit Test & Training"

Classes are available every:  
Thursday at 11:15 AM
